Please Read Carefully Before Ordering

ORDER EARLY—It avoids disappointment by eliminating the chance of the variety selected being sold out. However, we do not discriminate, our prices are the same in the spring as in the fall. Our stock is always guaranteed, early or late, our large storage facilities permit this.

GUARANTEE—We ship only first quality stock which grows easily. It is clean, insect pest and disease free, healthy and true to name. Every bulb is fully guaranteed as such. Should any prove otherwise, we will gladly replace or refund your original purchase price.

SUBSTITUTION—We do not substitute unless directed to do so. However, a second choice is advisable if late in the season.

SIZE—Our bulb sizes are standard and liberal.

Large —1¼ inches or more in diameter (Nos. 1 and 2).

Medium—¾ to 1¼ inches in diameter (Nos. 3 and 4).

Small —¼ to ¾ inches in diameter (Nos. 5 and 6).

QUANTITY—3 bulbs will be sold at the 10 rate; 25 at the 100 rate; 250 at the 1,000 rate.

SHIPMENTS—Weather conditions govern this largely. They usually start about March 15th. Unless otherwise directed.

DELIVERY—All orders amounting to \$1.00 or more will be delivered free to all parts reached by Parcels Post. Orders amounting to less than \$1.00 will add 15c for postage.

SALES TAX—**Only orders from Ohio**—which are not for resale of bulbs or flowers, will add 3% sales tax.

TERMS—Remittances should accompany your order, and should be made by check bank draft, American Express or Postal money order.

REFERENCE—For our standing, you may refer to:
The McDowell National Bank of Sharon, Pa.

PRICES—having a number prefix, as **2-.05**, means **2 for 5 cents**.

Prices as given in this catalog supersede all previous quotations.

SERVICE—As we are one of the largest producers of gladiolus, we offer the best, with courtesy, being fully appreciative of your patronage.

BULB PERFORMANCE—For the maximum performance or exhibition spikes—**Large** (over 1¼") are much to be preferred. **Medium** (¾ to 1¼") bulbs are of blooming size but the flower is not as large and requiring more time to bloom; **Small** (¼ to ¾") bulbs will at times bloom late in the season and are noticeably smaller in size; **Bulblets** cannot be depended upon, either to bloom or for germination, many fail to grow under the very best of conditions.

Major Edward Bowes (1936)

The Major Edward Bowes variety is one that you can enjoy fully, as it is of vigorous growth, healthy and a massive plant. The flowers are large, a bitter-sweet pink with an overlay of a slightly deeper tone; the small pinard yellow throat adds much to the attractiveness and beauty of this variety. The "Major" claims it is "overwhelmingly" beautiful. The spikes are very tall and strong, built to carry well the many flowers that open at one time, up to 12. This is an excellent cut flower variety with perfect keeping qualities and always in demand. A heavy propagator.

"Sensational" is always included in the many unsolicited testimonials we receive on the "Major". Many claim five foot spikes, large flowers with eight or more open, from small bulbs. The "Major" displayed at the Empire state show at Rochester, N. Y., 1937, in two eight foot baskets on either side of the stage, showed well its great size and beauty and gave an excellent demonstration of its exceptional keeping quality, lasting thru the entire show. On the bench the "Major" was given a blue ribbon in its crowded class. This is one of the very finest cut flower varieties. You will profit with it. Get your start this year.

Major Bowes prices—please see page 18.

STEWART ORIGINATIONS

for 1938

Include remarkable new shadings, combined with the best growing habits. Each variety possesses its individual beauty and character. They have been selected with great care and bring to you the best obtainable.

Mrs. Walter P. Chrysler

That this variety (illustrated on front cover) should receive the single distinction of being named in honor of one who so thoroughly enjoys gladiolus, makes us very happy. It is indeed a pleasure to name this variety Mrs. Walter P. Chrysler, wife of Mr. Walter P. Chrysler, president of the Chrysler Automobile Corporation.

This flower is distinctly different, with its curls and ruffles, we have seen nothing to compare to the individuality this flower possesses. The large flowers are free, yet in perfect symmetry. Four or more of these light rose pink flowers are open at one time, blending nicely to a bright throat; a pronounced deep rose line marks the center of each petal. This beautiful blending of color combined with the distinctive curls and ruffles greatly enhances the beauty of this new novelty. A variety which will soon be grown by all lovers of gladiolus, it is excellent for the home garden, and is equally desirable as a cut flower, possessing the best of substance. A free producer.

MRS. WALTER P. CHRYSLER PRICES—Any size bulb \$10.00 each;
Bulblets \$10.00 for three.

Andree Clark

Many have asked, when seeing this variety in our gardens or on display, why a variety so lovely, had not been named. It would seem that it had been reserved for this occasion, the privilege it gives me, to name it in memory of a daughter of Mrs. William A. Clark, widow of the late Senator William A. Clark of Montana.

The variety was awarded a blue ribbon when shown as a seedling. The flowers are a perfectly clear light rose pink without markings. The spikes are tall and upright, carrying perfectly six or more of these lovely large flowers open at one time. It is certain to become a very popular and lasting variety with its strong habits of growth and ease of production. Florists repeatedly ask for it now.

ANDREE CLARK PRICES—Any size Bulb, \$5.00 each; Bulblets, \$5.00 for three.

La Grace

Here we offer charm, in a medium size flower and plant, hardly possible in the large and glamorous types. The flower is an exquisite light La France pink with vivid thumb nail throat marks of bright pink, all combining to enhance the sweetness of this refined variety. There are several of these flowers open at one time on a nice slender erect spike. The popularity of this variety here and when shown would suggest at least a slight uptrend in the demand for the somewhat smaller but beautiful flower. This is not Primulinus. The bulblets are produced only in a good amount and germinate the same.

LA GRACE PRICES—Any size Bulb, \$5.00 each; Bulblets, \$5.00 for 3.

Persian Orange

The accompanying illustration can hardly show the clearness and beauty of this perfectly smooth and glowing true persian orange, a shade that is brand new and most desirable. The clear, sharp median lines add a chickness to this variety that increases its charm very materially. The flowers are of good size, six are opened at one time with ease, on an always strong straight spike of 18 or more buds. This variety for best results needs to be well grown. A good producer and a blue ribbon winner as a seedling.

PERSIAN ORANGE—

Large Bulbs \$5.00 each;
Bulblets, \$5.00 for three.

VALENTINE

This magnificent bright rose has been one of the really popular varieties in our garden. It is a perfectly clear shade and very attractive with its large, soft white throat; it holds six or more of these large flowers open at one time. The plant is of vigorous growth, erect spikes carrying 18 buds or more. This is a good propagator.

One of the most impressive novelties we have ever grown; it pleases all. This one, too, a winner when shown as a seedling and with plenty of competition.

VALENTINE—Any size

Bulbs, \$5.00 each; Bulblets, \$5.00 for three.

AN ADDED FEATURE

You will, we are certain, be glad to hear that in our endeavor to give you the very finest Gladiolus obtainable, we have extended our efforts to include—Our introducing of new varieties by other originators. We have sought out the exceptional, and now offer you for the first time A TRIO of SENSATIONAL, NEW GLADIOLUS—an unequalled yellow, by Mr. Clark of Massachusetts; an unequalled scarlet by Mr. Hedgecock of New York State, and an unbeatable buff by Mr. Patterson of Canada.

The stocks of these varieties are not large but sufficiently so that we may offer them at a very low introductory price. You should take advantage of this opportunity.

Mary Damaris

(By Clark)

That I should be so successful as to secure a seedling of this high calibre to offer you is indeed good fortune. This variety as a seedling won an Award of Merit in 1936 and in 1937 Blue Ribbons. These awards were made by the N.E.G.S. where competition is always keen. This is by far the most beautiful shade of soft velvety yellow I have ever seen in gladiolus, perfectly clear. The placement is ideal and holds eight or more perfectly developed large flowers open at one time. It consistently produces 40-inch spikes, always erect and strong, being a free and

The above photograph of MARY DAMARIS was made in England for Major George Churcher, a connoisseur of gladiolus, who has so generously supported his favorite flower in America as well as in his own country. Major Churcher was lavish with his praises of this new variety.

vigorous growing variety, a good producer of bulblets which germinate easily. Mary Damaris opens perfectly, fully developed large flowers after being cut and placed in water. This feature stamps it as the most satisfactory cut flower yellow we have; ideal for close markets and truly a wonderful "shipper". You can profit with this variety and there is no time like the present to start.

MARY DAMARIS PRICES—Large and Medium Bulbs, \$1.00 each; Small \$.50 each; Bulblets, \$1.00 for ten.

Lindsay

(by Patterson)

An enviable record has already been established by this variety. It has been awarded the coveted Blue Ribbon every time it has been shown. In 1935 it won highest honors as a seedling. In 1936 it was grand champion. Its latest accomplishment, that of the Canadian Gladiolus Society Show in August, 1937, where in its crowded color class were entries which included every leading buff or buff-orange variety we have today—here "Lindsay" again came out on top with the Blue Ribbon. The variety possesses wonderful substance, hence its ability to hold 8 and 9 open on the show table, and which makes it an excellent cut flower. It is a seedling of Rattray x Apricot Glow. Its genuine habits and characteristics follow the latter parent except that the flowers are larger and an improved shape. More open and firmer. The flowers are large of a slightly buff-orange. Tall, erect and strong spikes are easily developed by this vigorous grower. A graceful plant—healthy and a good producer. You can hardly afford not to start with this new one. Its record to date indicates its quality and color will take it far in the lead, and quickly.

LINDSAY PRICES—Any siz Bulbs, \$1.00 each; Bulblets, \$1.00 for three.

Flash

(by Hedgecock)

The most sensational and biggest we have ever seen, such was the immediate response from all the growers who saw this flower. Truly giant flowers of perfectly clear scarlet—the throat is some darker and the lower petals have a delicate median line of cream. The intensely luminous flowers measure about seven inches across and there are easily five and more open at one time. The parentage, Picardy X Commander Koehl, accounts for its exceptional growth and ability to produce bulblets that grow. The flower is of the Picardy type—the spike seems to follow Commander Koehl a little more than Picardy and about the same height. A decided advance in the reds is represented here and should easily supercede the varieties in this color class which have held sway for some time. It makes an excellent cut flower with its firmness and strong spike of color, for the home or for the florist it will serve perfectly. We anticipate a big demand for this variety. Growers will profit with an early start.

FLASH PRICES—Large and Medium Bulbs, \$1.00 each; Small Bulbs, 50 cents each; Bulblets, \$1.00 for ten.

MEDIUM SIZED FLOWERS

For several years gladiolus have been ignored unless they were big, both in size of flower and spike. Today, however, we find a very definite trend toward the appreciation of the medium sized decoratives. This is as it should be. They are new in type and beauty and a marked advance. There is an increased use of them for table decoration in the home and a big demand from the florists who are now using small vases extensively.

There are several of these new and truly beautiful varieties, of which Jessica Dragonette and La Grace are but two. Made up in flat or in low vases not over six inches high they are delicate, refined and in the best of taste.

I firmly believe there is a definite place for both the medium and large types.

Jessica Dragonette

The flower is an exquisite, perfectly clear rose-pink, blending to a lighter throat—the entire flower, which is of good size, has a blue sheen, giving it refinement and beauty. The plants are vigorous, producing strong, erect spikes better than medium high, and carrying four or more flowers open. A good producer of bulblets that grow. An early variety and a favorite with all who have seen it and grown it. For prices see page 18.

SUCCESS

This perfectly pure white is extremely attractive, with its large wide open flowers, five or more of them at one time and an always tall, strong, but graceful spike carrying 20 or more buds. A good producer and a healthy plant. This variety is consistent in the development of quality spikes and flowers, making it a very valuable cut flower variety. We have shipped these to Iowa and to New York with wonderfully satisfactory results. Those who have seen this variety unhesitatingly pronounce it a beauty.

SUCCESS Prices, see p. 23.

ELITE

A salmon pink to peach red with a snappy cream Neapolitan throat and median lines. The characteristic curls to the petals of the flowers enhance its beauty. Six or more good sized flowers open at one time on a tall, erect spike. Very good producer of bulblets that will germinate well.

ELITE Prices, see page 15.

Alfred M. Landon

Coming well before the rush, makes this a much sought for flower by the florist. This with Village Queen and "Jessica" make a trio of top price cut flowers on the wholesale markets, each being new and a much needed color at this season. "Landon" is a tall, rugged, always straight spike of 20 or more bulbs with easily 8 or more open. The flowers are of good size and a light soft scarlet, slight lines in the throat. A vigorous growing plant, producing a quantity of bulblets that germinate well.

LANDON PRICES,
see page 12.

BLUE BIZARRE

THIS NOVELTY wherever shown has always attracted attention, the unusual color blending being a light violet blue with overlays of deeper shades, which vary to a large degree in the flowers, some being comparatively clear. The spike is of good size, holding several good sized flowers open. A good increaser and a real novelty for the garden, and used a great deal as a cut flower.

BLUE BIZARRE Prices,
please see page 13.

ALICE HERRIOTT

The warmth of this beauty and its shadings make it a highly desirable variety. A rich cherry-rose with just a cast of blue to the upper throat. A tall, strong spike, it will hold nicely eight or more of these good sized flowers open at one time. This was one of our attractions at the Rochester show this past season, and is certain to become very popular. ALICE HERRIOTT Prices, please see page 12.

Elsie Adele

Again we call attention to individuality—a perfectly clear and smooth blush La France pink, a dignified beauty. Spikes are tall and erect, five or more large flowers are opened at a time. This, too, comes before the rush of mid-summer varieties and is a very valuable and profitable variety for the grower. Boston fans gave it their approval in very definite terms. It is elegant.

ELSIE ADELE Prices, please see page 15.

MARGARET STEWART

Singled out at the Boston show as a real beauty, this variety repeats its performance as it received equal glory at Cleveland and Chicago. Not glamorous, but a refined and beautiful red-red rose in color, a shade not to be found in others. Its habits of growth are the best, with strong erect spikes—rich, healthy plants make this a much to be desired flower. Florists use it freely—which would in itself indicate a new and correct shade of rose red.

MARGARET STEWART Prices please see page 19.

“Your Assurance of Beautiful Flowers”

Our gladiolus bulbs are the best it is possible to produce. They are well grown, without pampering or irrigation, are scientifically harvested, cleaned and stored. They receive final inspection and preparation before delivery to you. They reflect this culture and care by giving you their beautiful bloom, the kind of bloom all flower lovers are looking for. Be sure to give them a trial—this season.

MAJOR EDWARD BOWES

OFFICES AND STUDIOS
C - B - S RADIO THEATRE
BROADWAY - 53RD ST
NEW YORK

August 17th, 1937.

Carson R. Stewart, Esq.,
Burg Hill,
Ohio.

Dear Mr. Stewart:

Mrs. Walter P. Chrysler is delighted with the gladiolus you have named in her honor. It is very beautiful indeed, and distinctly an addition to the gladiolus family.

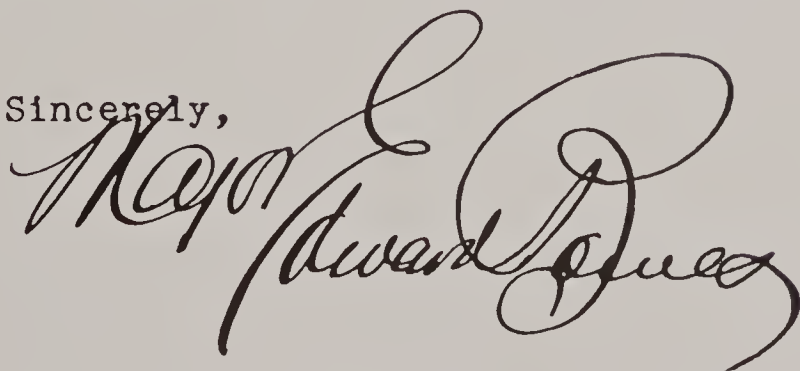

My own gardens this year have been somewhat of a disappointment - but the wonderful showing of gladioli, all from your bulbs, has made up for everything.

I have never seen such beautiful blossoms - tall and strong and powerful - they run the gamut of beauty and color and outlast any cut flowers I have ever had!

I know the lifetime of devotion you have given to perfecting the gladiolus, and you may well feel that you have not lived in vain.

My compliments and esteem.

Sincerely,

A large, elegant handwritten signature in dark ink, reading "Major Edward Bowes". The signature is written in a cursive style with long, flowing loops and is positioned to the right of the word "Sincerely,".

EB:F

While I am normally modest, it is with some degree of pride that I publish this letter (with the Major's kind permission) which speaks very clearly for itself. This is but one of many, many letters I receive of this nature, all of them being equally sincere in their expressions. I am indeed grateful for them and thank each one of you kindly for having written me. I can assure you there will be extended and constant effort on our part to please you, that we may warrant the continued receipt of such inspiring letters.

STEWART SELECT GLADIOLUS

Annually our trial gardens are crowded with the newer varieties from the world over; only those whose real beauty and all around performance, meeting with our rigid requirements, are selected. Your enthusiastic acceptance of our selections in the past, encouraged us to continue an even more exacting policy this past season.

Originators names immediately follow (in parenthesis) the name of their variety, some are abbreviated, from Scotland—Mair; France—Le Moine; Holland—Grulleman’s, Velthuys and Pfitzer (PF); Australia—Errey, Rides, Symons, Gilrey, Phillips, Swenson, Fallu and Ball; New Zealand—Donney, Julyan, Burns and Whitely, and from Canada—Crow, Palmer and Groff. In the United States Kunderd is abbreviated (K); Diener (D) and Hornberger (Horn.)

We assure you the varieties offered in this catalog are again the very finest obtainable; TRY THEM, permit them to GLORIFY YOUR GARDEN THIS YEAR.

YOU TOO will enjoy Stewart gladiolus; they grow easily; their large and beautiful flowers will more than please even the most discriminating.

Phyllis McQuiston (Stewart)

Thousands of friends have been made for me through the color, beauty and performance of this grand variety. The leading pure pink, is the judgment passed on it by many, and when a little better known there will be millions grown. The testimonials we have received on "Phyllis" from growers are of the highest. No better expressions could be given any flower.

The flowers are very large and of a gorgeous pure pink blending to a lighter throat which never flakes. They are always carried well on a faultlessly developed and always tall, strong, straight spike, perfectly proportioned, a combination that spells success for the grower, as it has no peer as a cut flower for local markets or for shipping a distance, it will open wide and perfectly.

As a trail blazer for Stewart originations and introductions of other originators this variety has done marvelously well. I cannot say too much for this variety; it has meant much to me and I am sure it will do equally well for you.

We receive quantities of letters complimenting us on "Phyllis", from those who grow it in their garden for home decoration, from the grower both large and small, telling of their success in growing it and their profits; from florists who insist on this variety, and from wholesalers who have no trouble moving it at top prices. If you have not already grown "Phyllis" or if you want more, get yours this season. You will both enjoy and profit with "Phyllis".

PHYLLIS McQUISTON

HAVE YOU FOUND in our catalog just what you would like? If not, may we help? Many write us telling us what they would like or would like to do, leaving the selection of varieties to us.

SPECIAL VALUES IN ASSORTMENTS

Unsurpassed in Quality, Attractively Low in Price

Those who do not care to grow the varieties separately and by name, but who do want the very best of flowers, will find the following assortments more than satisfactory. We do not grow a mixture. These assortments are made up FOR YOU. If you have a preference for any particular color, we will be happy to put forth every effort to meet your request. The very large number of varieties which we grow are representative of the best efforts of the leading originators from all over the world. This enables us to offer you ASSORTMENTS THAT ARE UNEQUALLED in wide color range, choice varieties and quality stock. This includes plain petaled, ruffled and other types. The various varieties are NOT labeled as to their names.

Included with each assortment—for trial—is one new and valuable variety, bagged separately and labeled. These assortments are very special, bulbs are large (1" or more), prepaid delivery. Please order by number. You, too, will be thrilled with these beauties. ORDER YOURS TODAY.

No. 1. This is our most popular assortment, all large flowers. We have large numbers of complimentary letters on this collection. It will please you. Over 40 different varieties. 100 bulbs, \$3.00; 50 bulbs, \$1.50; 30 bulbs, \$1.00.

No. 2. Primulinus. This assortment contains about 15 different varieties of this artistic type. The color range is very wide and includes plain and ruffled petaled varieties. For those who prefer this type which is so desirable for table decoration, this assortment cannot be equalled at this very low price. 100 bulbs, \$3.00; 50 bulbs, \$1.25; 30 bulbs, \$1.00.

No. 3. This assortment is the same as No. 1, except that it has many of the newer and higher priced varieties. A real value. 100 bulbs, \$5.00; 50 bulbs, \$2.50; 25 bulbs, \$1.25.

No. 4. Connoisseur's Assortment, including only the new and very finest high priced beauties. This is truly a Super Assortment. 40 different (more if you wish) varieties. Unequalled value. 100 bulbs, \$10.00; 50 bulbs, \$5.00; 25 bulbs, \$2.50; 12 bulbs, \$1.25.

Medium size bulbs of the above offers at one-half the price.

CARE AND CULTURE

THE GLADIOLUS can be successfully grown in practically any part of our U. S. They are easily grown and respond wonderfully to a little attention, such as timely watering and cultivation. They will adapt themselves to most any garden and will be found doing much better than most flowers with an equal amount of effort by the grower, be they amateur or professional.

THE PACKAGE when received should be opened at once to admit air directly on bulbs—store in cool, dry and frost-proof place until planting time.

SOIL—Any good garden soil is very satisfactory; it is important that the soil should not be worked when wet, and should be kept pliable at all times during the growing season.

LOCATION—They will not do their best in too much shade. They enjoy being planted in rows or in beds; they are valuable in the landscape, putting clumps of all one color or mixed at suitable points for the desired effect. The ground should be well drained for best results.

DISINFECTING—Precautionary measures guarding against insect pests and bulb troubles are very effective and most economical. The garden should be cleaned and the old tops of gladiolus as well as the tops of other plants and other refuse should be raked up and burned. The storage room should be clean and disinfected as well as the bulb containers before using them to store bulbs over winter. Disinfecting all bulbs before planting is an easy task and is advisable as it will practically eliminate any disease or insect pest. We offer but one method: this accomplishes all in one operation; use at the rate of one ounce of Bichloride of Mercury (poison) to 10 gallons water (B. of M. is more soluble in warm water). soak from 8 to 10 hours, the night before planting, (not necessary to remove husks); a simple procedure is to place bulbs in salt or sugar bags, tie strong string around top of bag, other end of string carrying the variety name on it, drop in solution, a stick will punch them under—after soaking, remove, hang up by string to dry; they may be planted wet. Use non-metallic container for the B. of M.

PLANTING—Have soil loose; make trench or hole deep enough so that bulbs can be covered with three inches of dirt, (sandy soil, five inches); plant bulbs three inches apart in the row. If fertilizer is used at planting time, keep at least two inches from bulb, by covering bulb with dirt before adding the fertilizer.

WATER and CULTIVATION—Water thoroughly so that it will soak down to the bulb, at least once a week, but count a good rain as one; cultivate thoroughly next day if not sticky.

THE FLOWER—If you wish to cut the flower do it when the first flower opens wide. To get a nice spike with it, slide the knife down close to spike on one side stopping six to eight inches from ground, then slide it down the opposite side giving knife a twist at the bottom to remove spike with flowers; this operation cuts leaves from spike but they remain on the plant, which is essential to properly mature the bulb.

HARVESTING—Bulbs should be ready to dig three to six weeks after blooming, or dig when foliage starts to turn brown. Loosen bulb with fork or other tool and bulb will lift out by the top—shake dirt off—cut tops off close to bulb, let bulb fall in clean container (three inches deep), pile up tops for burning. Let bulbs cure three to six weeks in a dry, airy, frost-proof place, stir occasionally for thorough drying—they must be dry. When ready, the old root should snap off easily, leaving bulb clean; now store away for winter in containers (boxes or bags) not over four inches deep, in a cool, dry, frost-proof place.

WHOLESALE PRICE LIST

PRICES ARE F.O.B. BURG HILL, OHIO

PRICED PER 100: The 1,000 rate is 8 times the 100 rate.

Not less than 25 of the same variety and size at the 100 rate.

Not less than 250 of the same variety and size at the 1,000 rate.

Bulblets—1 pint or ½ pint at the quart rate.

Quotations will be made on quantities and varieties not included in this list.
